Later in this interview, we will be asking questions about household and family finances, for example about your savings for old-age and financial support to children and other relatives. We only need to ask these questions of one of you. Which of you would be the one most able to answer questions about your finances?

Let me just repeat that this interview is confidential. Your answers will be used only for research purposes. If we should come to any question you don't want to answer, just let me know and I will go on to the next question. Now I would like to begin by asking some questions about your background.

Let me just repeat that this interview is confidential. Your answers will be used only for research purposes. If we should come to any question you don't want to answer, just let me know and I will go on to the next question. During our previous interview we asked you about your life. In the past years, many participants of SHARE allowed us to take physical health measurements like their grip and lung strength. This year, to more precisely assess disease risk, we would like to collect a few blood drops using just a finger prick as it is done daily by millions of diabetic people. We would be very grateful if you would agree to participate. This is an important part of the study, as the analysis of blood samples will tell us a lot about the health of the population. I will explain more to you about it. Yet, this measurement is absolutely voluntary. If you do not wish to have your finger pricked, we will leave it out and continue the interview without the biomedical part.
