Some time ago we sent you an invitation letter which also included a data protection statement.
I will now give you this statement again and will be pleased to answer any question that you may have.

Let me stress that participating in this interview is voluntary and that the information is kept confidential.
Your answers will be used only for research purposes in different analyses, without the individual researcher knowing your identity.
If we should come to any question you don’t want to answer, just let me know and I will go on to the next question.

Do you agree to participate in this study?
Hand out the statement to R. Answer all questions of the R.

Main public sickness benefits: they are contribution-based payments received as an earnings replacement when an employee is off sick. Main public disability insurance pension: if the sickness turns out to be long-standing, and a return to work is not to be expected, then the claimant will typically be transferred to a disability insurance pension (e.g. invalidity or incapacity benefits). The term 'pension' in the heading of this category is to be meant as 'regular payment', rather than relating to old age. Public unemployment benefit or insurance: they are received, for a limited time period, by previous employees, later finding themselves unemployed. Eligibility is based on a history of insurance contribution. Social assistance: it includes cash or voucher programmes meant to provide a general ‘safety net’, guaranteeing minimum resources to those otherwise lacking resources from either employment or contributory based social security benefits/pensions. Code all that apply.

AX001_Introduction (INTRO ACCELEROMETER)
I now want to ask you to participate in a special measurement.
To study ageing, it is important to know how much people over 50 sit, sleep and move.
We will measure this in a precise and objective manner.
For that, we want to ask you to wear a small activity meter for 8 days. The meter is small and is worn on the upper leg.
We will not be able to track your location while you are wearing it, we only measure your movements.
I will show you what it looks like now. You can attach it very easily to your upper thigh with a tape. It is similar to using a band-aid.
Show instruction booklet with pictures and explain.

Start of a Non-proxy section.
No proxy allowed.
If the respondent is not present or not capable to give consent to participation on her/his own, press CTRL-K at each question.
1. Continue

AX002_Willingness (WILLINGNESS TO PARTICIPATE IN AX STUDY)
If you participate, you will wear this small meter on the upper leg, day and night, for 8 days. This means 8 x 24 hours. You do not need to move more or less than you usually do.
We want to capture how much you sit, sleep and move around in your every day life.
The motion measures are downloaded by us from the meter and are processed in an anonymized format.
I emphasize that participation in this measurement is fully voluntary.

Would you be willing to participate in this special measurement?
There are no exclusion criteria for the participation in this study. We are also interested in people who move very little or state to not move at all.
1. Yes
5. No

IF (AX002_Willingness <> a1)
Please select the reason why R is not willing to participate in the accelerometry study. Read only if unclear: “May I ask what the main reason is for you to refrain from participating?” Do not read out the answers.

1. R believes he/she is not active enough
2. R considers him/herself too old
3. R cannot participate because of work or hobby
4. R will be absent for a longer time
5. R considers it too complicated or too burdensome
6. R considers it as a violation of privacy
7. R prefers not to participate because of allergy/sensitive skin
97. Other (Specify)

IF (AX003_Reasons = a1)
- AX007_NotActive (Refusal conversion not active)
  I understand that you consider yourself not active enough.
  For this study, it is important that not only active people participate but also people who are not so active or even disabled.
  Only then can the researchers get a complete picture of health and activity in the [country’s] population.
  If we would include only active persons, the health and activity of the ageing population would appear better than it actually is.
  Your participation in the study is hence very valuable.
  Would you now be willing to participate in this special measurement?
  1. Yes
  5. No

ENDIF

IF (AX003_Reasons = a2)
- AX008_TooOld (Refusal conversion too old)
  I understand that you consider yourself too old.
  For this study, it is important that not only younger persons participate but also older persons. Only then can the researchers get a complete picture of health and activity in the [country’s] population.
  If we would include only healthy and younger persons, the health and activity of the ageing population would appear better than it actually is.
  Your participation in the study is hence very valuable.
  Would you now be willing to participate in this special measurement?
  1. Yes
  5. Yes

ENDIF

IF (AX003_Reasons = a3)
- AX009_WorkOrHobby (Refusal conversion work or hobby)
  I understand that you consider the device to be limiting in pursuing your work or hobbies. The device is very small, lightweight, and easy to wear. You do not have to worry about it during your daily activities. You don’t have to turn it on or off, it works by itself. Most people who wear it almost forget they are wearing it.
  Would you now be willing to participate in this special measurement?
  1. Yes
  5. No

ENDIF

IF (AX003_Reasons = a4)
- AX010_Absence (Refusal conversion absence)
  You indicated that you will be absent for a longer time.
  You only have to wear the accelerometer for 8 consecutive days. Only if you will be absent all the time until June 2020 you cannot participate. If you will be absent for a few weeks, for example for holidays or work, we can take that into account and send you the accelerometer in another week.
  Would you now be willing to participate in this special measurement?
  1. Yes
  5. No

ENDIF

IF (AX003_Reasons = a5)
- AX011_NoBurden (Refusal conversion no burden)
  I understand that you consider participation too complicated or burdensome.
  The only thing you have to do is to wear the accelerometer for 8 consecutive days. It is very small and lightweight, easy to attach, and you do not have to worry about it. You don’t have to turn it on or off, or do anything else with it during the wear, it works by itself. Most people who wear it almost forget they are wearing it. After the 8 days, you can simply return it to us in the envelop that comes with it.
  You will get [country incentive] for your participation.
  Would you now be willing to participate in this special measurement?
  1. Yes
  5. No

ENDIF

IF (AX003_Reasons = a6)
- AX012_Privacy (Refusal conversion privacy)
  If I understand correctly, you think that wearing the device would give access to your private and sensitive data. The device is not GPS-enabled, your exact location cannot be recorded. The device simply measures the number and intensity of your movements and nothing else. There is no possibility to track your whereabouts or to measure any other information.
  Would you now be willing to participate in this special measurement?
1. Yes
5. No

ENDIF

IF (AX003_Reasons = a7)

AX013_Skin (OFFICIAL CONVERSION SKIN)
If I understand correctly, you think the tape with which you attach the device will damage your skin or provoke an allergic reaction. The tape is specially designed for longer wear time on the skin. It is used for medical purposes where people have to wear devices directly on the skin for a longer period than eight days. The risk of an allergic reaction is therefore very small.

Would you now be willing to participate in this special measurement?
