Share 2004 Questionnaire version 10 (manually edited April 2005)

Preface

This generic paper version of the SHARE-questionnaire is edited manually. Therefore it is more ‘user-friendly’ than the automatically generated paper versions for each of the participating countries.

This main part of the SHARE 2004 questionnaire is asked to all eligible individuals in a household, who have been identified in the introductory Coverscreen Module (cv; see SHARE 2004 Coverscreen version 10). However, some modules concerning the household rather than the individual are only answered by the designated financial, family, or housing respondent.

All variable names in this paper version are highlighted using bold characters and are followed by the variable label (e.g. CV004_ FIRST NAME RESPONDENT). In general, the variable names and labels in this paper version of the questionnaire are similar to the variable names and labels used in the data set.

Local currencies and pre-Euro currency variables are converted into Euro values in the data set and stored with the separation identifier ‘_’ in the variable name replaced by ‘e’. For unfolding bracket variables ‘_’ is replaced by ‘ub’ and bracket values are stored in variables using ‘v’ instead of ‘_’.

Dummy variables have been generated for each option of a multiple answer question, with ‘d’ instead of the separator ‘_’. The number of the answer category is indicated by the last number of the respective dummy variable’s name.

All conditions (IF STATEMENTS) are in capital letters and italics. The pipelines on the left hand side provide information about the number of applying conditions.

Please consult the SHARE data dissemination site for more detailed information on the construction of the data set, the definition of variables, etc.
